Ms. Bethany Chan（Teaching Assistant）

Being able to use English allows us to enjoy ample opportunities to learn about the world and gain more knowledge in terms of science, technology, literature, etc. English language also brings us a wide range of entertainments, for examples, if you love travelling, English helps us communicate with people from many other countries as English is widely used; if you enjoy watching movies, you should have noticed that a lot of good shows are originally conducted in English; if you are a fan of digital games, you will see many of these websites written in English, and you may get some tips through forums or discussions.

As you can see, English is extensively applicable to many aspects in our daily life. Therefore, we should take action to expand our learning experience outside the classroom, and it would be a wise decision to explore this wonderful language with someone who is as enthusiastic as you are. Please make a reservation and let us know the language support you need, such as listening & speaking, reading & writing, IELTS drilling, grammar reinforcement, etc.
